Replacement Regulator Fitting Instructions

FOR NIPPON DENSO TYPE FAN COOLED ALTERNATORS

Installation Procedure

Step 1

Remove the existing regulator by removing the two screws attaching the regulator and protective housing. You will also need to unsolder the two pins from the bottom which are visible from the backside of the part.

Step 2

Position and fasten the new Regulator Rectifier, with the spacer nested against the backing plate, the tab of the regulator on top of the spacer, using the supplied screw.

Step 3

Connect the BLACK ring terminal using one existing screw.

Step 4

Connect the RED ring terminal using one existing screw.

Troubleshooting

If the charging system is still not working: *Before calling technical support at ElectroSport*, preform a few basic tests: 1) Re-check the connections, Be sure that you have used quality crimp connections. Twisting wires together or taping wires will not work. 2) Download ElectroSport's comprehensive FAULT-FINDING CHART FOR MOTORCYCLE CHARGING SYSTEMS from at: <http://www.electrosport.com> and follow all the procedures listed.
