

- The **WILD ASS** motorcycle air cushion was designed using clinically proven medical seating technology.
- The cushion eliminates painful pressure points and promotes proper circulation utilizing adjustable interconnected air cells which conform to the rider's shape regardless of weight or seating position.
- Additional benefits are reduction of shock and vibration to reduce lower back pain and air circulation under the rider to disperse heat and perspiration.
- Recommended for riders who would like reduction of painful pressure points, increased blood circulation, reduced vibration, shock absorption, heat and moisture reduction in the seating area.

## AIR GEL

- With three layers of polyurethane, the Air Gel is unlike any other cushion in the market.
- Gel pads inserted inside each individual air cell provide additional cushioning, shock absorption, and vibration dampening.
- Air Gel can also be used without air when the rider wishes to feel 100% “close to the bike” with some additional cushioning.
- The Air Gel is a great mid-priced cushion for riders with multiple cushion needs.

## LITE

- Made of economical light weight polyurethane, the Lite reduces painful pressure points, promotes circulation, reduces heat and moisture build up.
- Reduces shock and vibration better than any other low cost comfort product on the market.
- Lite is great for the budget conscious occasional rider.
